Geographical features

1 SPEAKING Work with a partner. Name one famous example for each of the words in the box. Use a dictionary if necessary.

- beach - Copacabana
- desert
- forest
- ice cap
- island
- jungle/rainforest
- lake
- mountain
- mountain range
- ocean/sea
- river
- valley

You can recycle bottles here.
That can reduce pollution.

2 Listen and repeat.

3 Play a game. Draw a word from 1 on the board. Can the class guess the word?

The environment

4 Work with a partner. Match the definitions with some of the words in the box.

- drought
- flood
- global warming
- greenhouse effect
- melt
- nuclear disaster
- oil spill
- ozone layer
- pollution
- recycle
- save
- waste

1 when heat cannot escape from the atmosphere and the temperature on Earth goes up greenhouse effect

2 when ice turns to water

3 a long period of time when there is no rain

4 the part of the Earth's atmosphere which protects the earth from the sun

5 the process of making the air, water or land worse, with chemicals, for example

6 a large quantity of water that suddenly covers an area

7 the increase in the temperature on Earth

8 an accident with nuclear power, usually causing radioactivity

9 an accident when oil comes out of its container, for example at sea

6 LISTENING Listen to four descriptions of environmental problems. Match each description to a photo in 5.

1 2 3 4

7 SPEAKING Work with a partner. Ask and answer these questions.

1 How is global warming affecting your country?
2 Where and when do you have floods or droughts in your country?
3 How do people waste water or electricity in your country?
4 What do you do to save water or electricity?
5 What products or materials do you recycle?
1a Work with a partner. Look at the two photos on the right. Talk about what you can see. What do you think is the connection between them?

1b Look at the title of the article and the photos. What could ‘the most important building in the world’ be and why?

2 You have three minutes to read the text and check your prediction.

3 Choose the correct alternative. Write the letter of the paragraph where you found the answer.

1 Countries pay/don’t pay to keep their seeds there.

Paragraph ............

2 If there is an electrical problem at the Seed Vault, the temperature will/won’t be a problem.

Paragraph ............

3 The most important thing about the location of the Seed Vault is that it is easy to protect from attacks/the altitude will keep the seeds dry.

Paragraph ............

4 In the case of a future catastrophe, the important thing is to have a lot/wide variety of seeds.

Paragraph ............

5 The Svalbard Global Seed Vault has/doesn’t have millions of types of seeds.

Paragraph ............

6 Norway built the Svalbard Global Seed Vault because of global warming/possible environmental disasters.

Paragraph ............

7 People believe droughts and floods might/will never make it difficult to find food in the future.

Paragraph ............

4 CRITICAL THINKING

Think! Then compare ideas with your class.

- Do you agree that this is the most important building in the world? Why?
- What plants from your country do you think are important to protect?

5 What do the underlined words in the text mean? Guess and then check in your dictionary.

6 SPEAKING What about you?

Are you generally optimistic or pessimistic about the future of the planet? Why?
1a Look at the sentences.

They think the population will go up by 50%.
In 2028 the Svalbard Vault will celebrate its 20th anniversary.
Where can I find more information? I'll look on the Internet.
Yesterday the US decided what to do. They're going to send more seeds.
It's warm today. The ice is going to melt.

1b Match these explanations of the use of will and be going to with example sentences a–e in 1a.

We use will...
1 for decisions that we take at the moment of speaking.
2 to talk about an objective truth.
3 to make a general prediction. We often use think, hope, expect with this use.
We use be going to...
4 to make predictions based on some sort of evidence.
5 to talk about plans or intentions.

2a PRONUNCIATION Look at these sentences. Why do you think some words are marked in bold? Look at the words in bold? What is the pronunciation of going to?

1 The situation is going to get worse.
2 Temperatures are going to go up.
3 It's going to be a hot summer.
4 We're all going to have problems.
5 I'm going to do something to help.

2b PRONUNCIATION Listen. What happens to the words in bold? What is the pronunciation of be going to?

2c Listen again and repeat.

3 Complete the sentences with the correct form of the verbs given using will or be going to.

1 Experts expect that the ice cap (disappear) one day.
2 It's only 10 am but the sun is already strong. It (be) a hot day.
3 A: I'm really hot.
   B: I (open) the window.

6 People think that global warming (cause) lots of problems in the future.
7 A: I'm going to see a documentary about the environment.
   B: I (come) with you.

4 Write down six plans or intentions you have. Write about these areas:

1 school
2 home
3 work
4 sport/hobbies
5 family
6 friends

I'm going to do a school project next week.

5 Now write down six predictions for the future. Write about these areas:

1 the environment
2 TV
3 politics
4 fashion
5 sport
6 medicine

I think the planet will get hotter.

6 SPEAKING Work with a partner. Compare your plans and predictions from 4 and 5.

7a Look at the sentences and give an approximate percentage of certainty for each expression in bold.

1 The population will probably go up.
2 Global warming will definitely make a difference.
3 Perhaps there will be a nuclear disaster.
4 It's possible that the ice caps will melt.
5 We may have more and more floods.
6 Parts of the world might suffer droughts.
7 It probably won't be easy.
8 It definitely won't be a problem.

7b Look at the position of the adverbs definitely and probably in 7a. What do you notice?

Yesterday I got up at 7 am and I got ready for school...
Reducing our ecological footprint

**LIFE SKILLS OBJECTIVES**
- To learn about carbon footprints and water footprints.
- To consider positive action we can take to reduce our ecological footprints.
- To make an action plan to reduce our impact on the environment.

**KEY CONCEPTS**
- **climate change [n]**: People are worried about climate change. We are having hotter summers and colder winters.
- **carbon dioxide emissions [phrase]**: The carbon dioxide emissions from old cars are worse than from new cars.
- **greenhouse gases [phrase]**: If we burn fossil fuels, the greenhouse gases in the atmosphere increase.
- **fuel-efficient [adj]**: Modern cars are more fuel-efficient and use less petrol than before.
- **charge/recharge (a mobile phone) [v]**: My mobile phone has no power, I need to charge it.

1. Work with a partner. Look at these things. Are they bad for the environment? Why/Why not?

2. **READING**: Work with a partner. Student A: Read text A. Student B: Read text B. Answer the 4 questions about your text. Make notes with your answers.

   **Text A: Questions**
   1. What is a carbon footprint?
   2. What is the difference between the primary and secondary footprint? Give examples.
   3. Does the text mention any of the things in 1? Does it say that each one is good or bad?
   4. What does the text say people can do to reduce their carbon footprint?

   **Text B: Questions**
   1. What is a water footprint?
   2. What is the difference between the primary and secondary footprint? Give examples.
   3. Does the text mention any of the things in 1? Does it say that each one is good or bad?
   4. What does the text say people can do to reduce their water footprint?

**A Carbon footprint**

Everyone leaves a carbon footprint. It is the impact each person has on the environment through the emission of greenhouse gases.

Your carbon footprint has two parts: the primary footprint and the secondary footprint. The primary footprint shows the emissions of carbon dioxide and other greenhouse gases that you are directly responsible for. Examples are the emissions produced by travelling and using electricity. The secondary footprint shows the emissions that you are indirectly responsible for. These include things like the emissions produced when factories make the things that you buy. All of these carbon dioxide emissions contribute to global warming.

The size of your carbon footprint depends on many things. How you spend your free time is one of the most important. Do you watch TV and play video games or do you read or do sport outdoors? Do you fly when you go on holiday? If you do, your footprint will be much larger than if you go by train. Rail travel is three times more fuel-efficient than air travel. Where your food comes from will also affect your secondary footprint. Processed and packaged meat has a bigger impact on the environment.

You may think that you are not responsible for any emissions because your parents do all the shopping and decide a lot of things at home. And it’s true that your school is responsible for the things you do there. But you can suggest ways to change their habits. You can also watch less TV, switch off the light when you leave a room and unplug your mobile phone when it has finished charging. Each small action will help make your footprint smaller.
Water footprint

Water is essential in our daily lives. But sometimes the size of our water footprint is shocking. It shows the amount of water a person uses, directly or indirectly, every day.

All day we use water directly. This is our primary footprint. This includes the water we drink, the water we need for a shower or the water we use to wash the dishes. But what about the water that we use indirectly; the water used to produce, grow or make the things we buy? This is our secondary footprint, and sometimes it is much bigger than we think. After all, 70% of the world’s fresh water is used for agriculture so the things we eat can make a big difference. And, to make almost anything, from a computer to a T-shirt, you need water. Here are some facts that may make you think about how much water we use in a day:

- Brushing your teeth uses about seven and a half litres of water.
- It takes approximately 1,286 litres of water to produce a loaf of bread. But it takes about 2,310 litres to produce a 150g steak!
- An automatic dishwasher uses approximately 40 litres of water. Washing dishes by hand can use up to 75 litres.
- A typical individual in the United States uses 500 litres of water each day. But over 1 billion people in the world use less than 6 litres of water per day.
- The average toilet uses 8 litres of clean water each time you use it.

---

3 SPEAKING Use your notes in 2 to explain to your partner what carbon/water footprints are.

4 Work in a small group. Make a list of ideas about how your school could reduce its carbon and water footprints. reduce the paper we use – recycle it

5 LISTENING Watch the video or listen to students talking about their ideas for reducing carbon and water footprints at their school. Do they mention any of your ideas in 4?

6 Complete each sentence with one or two words. Watch or listen again if necessary.

1 At the school they have a box for and one for reusing all their old paper.
2 You need litres of water to make a sheet of paper.
3 They also recycle and at the school now.
4 People were wasting water and in the washrooms.
5 They wrote ‘Every thing helps!’ on their posters.
6 In the past, everybody to switch the lights off at the end of the day.
7 You need 10,000 litres of water to make a light bulb shine for hours.

7 How many of the things in 5 and 6 do you already do at your school?

---

LIFE TASK

You want to let other teenagers know about ecological footprints and what changes they can make to reduce their footprint at school. In groups prepare a poster or video with ideas about how to do this.

Follow this plan:

1 Make a list of ideas for things you can do in your school life to reduce your footprints. Use the ideas in the texts and in the video. Add your own ideas and search for others on the Internet.
2 Decide if you are going to make a video or a poster.
3 Organise your ideas in a logical way. Think about how you are going to persuade other students to make changes.
4 Make your video/poster.
5 Show it to the class.
1a **Speaking** Work with a partner. Look at the photo. What can you see?

1b Look at the words in the box. Check that you understand what they mean. What do you think could be the connection between them?

- charge a mobile phone
- corridor
- dance floor
- run
- sustainable energy

2 **Listening** 38 Listen to a science programme on the radio. Why do the words in 1b appear?

3 38 Listen again. Are the sentences True (T) or False (F)?

1 Simon Langton is the name of the school involved in this project.  **T/F**
2 The idea came from a boy who is studying at the school.  **T/F**
3 They think they can produce enough electricity to make hundreds of mobiles work for two and a half years.  **T/F**
4 The students walk on the special floor when they go to technology lessons.  **T/F**
5 Laurence first had the idea for this project when he was watching busy people moving around his university.  **T/F**
6 The school is the first place to use this technology.  **T/F**
7 You can use the technology to produce electricity by dancing.  **T/F**

4 Look again at the false sentences. Why are they false?

5 **Speaking** What about you?

1 Do you like this idea to produce sustainable energy? Why/Why not?
2 Can you think of any other ideas at school or at home to produce sustainable energy?

---

**Grammar in context**

### Zero conditional

1a **Look at the sentences in the zero conditional. Then choose the correct alternative.**

1 If you **run** in the corridors, you **get** into trouble.
2 You **produce** more energy if you **walk** fast.

We use the zero conditional to talk about **specific situations/things that are generally true.**

1b **Look again at the sentences in 1a.**

1 What tenses do we use in the zero conditional?

2 Does the half of the sentences with **if** always come first?

3 When do we use a comma in conditional sentences?

---

2 **Complete these sentences with the correct form of the verbs given.**

1 If it’s sunny, people often **go** to the beach.
2 If it **not rain** for months, the result is usually a drought.
3 If it rains a lot for months, there **be** often floods.
4 If you don’t water plants, they **die**.
5 If it **be** very sunny, it’s bad for your eyes.
6 If the sun **shine** all day, the temperature goes up.

---

3a **Write sentences to make general statements using the zero conditional.**

1 If I’m late for school, my teacher gets angry **with me**.
2 If you sit too close to the TV, **...**.
3 If you go to bed late, **...**.
4 I feel sad if **...**.
5 I enjoy English classes if **...**.
6 My parents are happy if **...**.

---

3b **Speaking** Work with a partner. Compare your sentences from 3a. Are any sentences the same?
First conditional

4a Look at these sentences in the first conditional. Then choose the correct alternative.
1. If you run in the corridors at this school, the teachers will be really happy.
2. The school will save money if they produce extra electricity.

We use the first conditional to talk about possible/impossible situations and their consequences.

4b Look at the sentences again and choose the correct alternative.
1. In the part of the sentence with if we use the present simple/will or won’t.
2. In the other part of the sentence we use the present simple/will or won’t.

5 Choose the correct alternative.

1. If we don’t/won’t recycle paper now, we need/will need to cut down more trees in the future.
2. If we cut/will cut down more trees, the forests disappear/will disappear.
3. There are/will be more deserts if the forests disappear/will disappear.
4. If there are/will be more deserts, the planet becomes/will become hotter.
5. Many plants and animals die/will die if the planet becomes/will become hotter.

6 Put the verbs in the correct tenses using the first conditional.

‘If we (a) ___________ (not do) something soon, electronic products (b) ___________ (create) serious problems for the environment. We use more and more energy because we buy more and more electronic gadgets. If this situation (c) ___________ (continue), each house (d) ___________ (need) an incredible quantity of energy. The popularity of computers, tablets and mobile phones has created an enormous need for more power. In the 1970s homes contained, on average, just 17 electronic products. But now some people think that they (e) ___________ (not be) able to brush their teeth if they (f) ___________ (not have) an electric toothbrush. If we (g) ___________ (forget) to switch off all these electronic gadgets, we (h) ___________ (use) up all of our electricity for nothing.’

7 SPEAKING Work in groups. Begin with this sentence.

If I pass all my exams this year, I’ll have a special holiday in the summer.

Take it in turns to add conditional sentences. How many sentences can you make?

If I have a special holiday in the summer, I’ll go with my friends.

If I go with my friends, I’ll ___.

If I pass all my exams this year, I’ll have a special holiday in the summer.

Developing writing

A formal letter

1 Read this newspaper article about climate change. What does the writer think about climate change and why?

ITER WEEK: CLIMATE CHANGE IS REAL!

Why do some people continue saying that climate change isn’t real? Haven’t they looked out of their windows recently? Winters are colder and summers are hotter. And humans keep producing more and more carbon dioxide emissions. Just a coincidence? I don’t think so!

2 Speaking Work with a partner. What do you think about climate change? Do you agree or disagree with Harry Macdonald? Why?

3 Here is a letter to the editor of the newspaper. Does the reader agree or disagree with Harry Macdonald? Are any of your ideas from 2 here?

Dear Editor,

I am writing in response to Harry Macdonald’s comments about climate change which appeared in your newspaper last week. Personally I agree with many of the things that Mr Macdonald says.

Firstly, it is clear that our weather is becoming more extreme each year. Furthermore, it appears that these changes are affecting the whole world, not just one or two areas.

Next, some people say that climate change is just a natural process. Nevertheless, there is evidence that man-made pollution is making climate change worse.

Finally, many people say it is too late to do anything about climate change. However, I think that governments and multinational companies use this as an excuse to continue polluting the atmosphere. What is more, I believe that if it is a question of the future of our planet, it is never too late to take action.

I will be interested in hearing other readers’ opinions on this subject.

Yours faithfully,

Max Turner

**Grammar reference**

**be going to**

- **USE**
  - We use *be going to* to talk about plans and intentions for the future. We use it for things that we have already decided to do in the future.
  - We can also use *be going to* to make predictions about the future, particularly when we have evidence for the prediction.

- **Examples**
  - I've decided that I'm going to study biology.
  - It's really cold. I think it's going to snow.

**will**

- **USE**
  - We use *will* and *wont* to make general predictions about the future. We often use *think, hope, expect, imagine*, etc. with *will* and *wont* to express our opinion about the future.
  - We also use *will* and *wont* when we decide to do something at the moment of speaking, for example when we suddenly offer to do something for someone.
  - We use *will* and *wont* to talk about the future when we consider it to be an objective truth.
  - We use *definitely, probably, perhaps, it's possible that* with *will* to say how certain we think something is.
  - *Definitely* is when we are very certain, *probably* when we are quite certain, and *perhaps* and *it's possible that* when we are 50% certain.

- **Examples**
  - I don't think the weather will be worse in the future.
  - You look tired. I'll carry your bag.
  - You look tired. I'll carry your bag.
  - I'll definitely be there. I definitely won't be there.

**Zero conditional**

- **FORM**
  - If + present simple, … present simple.
  - If you go out in the rain, you get wet.
  - The teachers aren't happy if we don't do our homework.

- **USE**
  - We use the zero conditional to talk about situations that are generally or always true.
  - *If you take a fish out of water, it dies.* ( = This is not just a specific situation – it always happens.)

**First conditional**

- **FORM**
  - If + present simple, … will + infinitive
  - If the climate changes, food will be a problem.
  - If we don't do something soon, the situation will get worse.

- **USE**
  - We use the first conditional to talk about possible and probable situations in the future and their consequences.
  - *If the sun comes out (possible future situation), we'll go to the beach (the consequence of this situation).*
